Summary

I am a Full Stack Web Developer who is a critical thinker, team player and loves a challenge. Recently received a Full Stack Development certificate from The University of Arizona. My experience as a Systems Engineer has given me knowledge of the cutting edge hardware and software being used to accelerate growth and new technologies in this space. I also have a strong business background that includes a Bachelor's degree in Finance that can be used to put a monetary perspective on projects as well. I am excited to leverage my expertise, education and knowledge and become an asset to a software development team.

Technical Skills

HTML5, CSS3, JavaScript, Bootstrap, jQuery, Node.js, Heroku, Git, React.js, MySQL, MongoDB, API frameworks

Projects

TrackThatTrack | <https://github.com/Bearpaw11/TrackThatTrack> | <https://bearpaw11.github.io/TrackThatTrack/>

- This is a project myself and 3 other developers made. It is an app that allows you to search for an artist and the app will return all sorts of information about that artist.
- This app was my vision and I took on the role of the senior developer on this project. I was in charge of the API's we used, writing the JavaScript/jQuery and I assisted with the design. I was also in charge of the
- For this app we used HTML, Bootstrap, CSS, jQuery, JavaScript, LastFM API, Bands Town API.

Weather Dashboard | https://github.com/Bearpaw11/Unit_06_Weather_Dashboard | https://bearpaw11.github.io/Unit_06_Weather_Dashboard/

- This is a weather app that I developed. This app will give the weather for a city that the user inputs. It will also give a 5 day forecast for that city as well.
- For this app I used HTML, Bootstrap, CSS, jQuery, JavaScript, Moment.js, OpenWeather API

Experience

Elite Athletes and Scholars - CEO and Software Developer 2019-Current

This is a company that I am working on getting off the ground. The mission of this company is to combat the student loan crisis by helping High School students get scholarships. I am doing this by creating dynamic websites students use to showcase their athletic and academic skills and achievements. Students and parents use these websites to present themselves to recruiters and coaches.

TechData - Systems Engineer 2018-Current

Responsible for discovering customer's needs and configuring the correct data storage system. This is done through a discovery phase that can include emails, conference calls, and one-on-one calls. Listening to the customer's needs and educating customers on what products are available to fulfill their needs are the most important parts of this process. Also, responsible for developing training material and giving technical presentation to my team to assist with their learning.

State Farm - Claims Specialist 2017-2018

Handled complex property & liability auto claims. Make liability decisions after investigating all aspects of the claim. Speak with customers and/or attorneys during inbound & outbound calls concerning claims. Pay invoices & appropriate subrogation demands. Communicate clearly with customers & put them at ease during the claims process.

Ancala Country Club - PGA 1st Assistant Golf Professional 2012-2017

Aaron's Sales and Lease - Accounts Manager 2009-2012

Education

Full Stack Web Development Certificate - University of Arizona

Bachelor of Science: Finance - Northern Arizona University
